What We Do

BDO Consulting has Insurance Claim Services professionals available to help businesses prepare business interruption and property damage claims who have been affected by natural and manmade events, including losses from:

- Hurricanes
- Flood
- Power disruptions
- Fire
- Industrial accidents (explosions)
- Civil disturbances

Our Services

We are available to help you prepare your insurance claim if you have been affected by Hurricane Ike and have incurred a significant loss of business income from **business interruption, contingent business interruption, civil authority, power outages or have incurred necessary extra expenses during your period of restoration to mitigate your loss.** Our professionals become key members of your insurance claim team and can assist with:

- Understanding the claim process
- Quantifying and documenting your loss
- Advising on fair and timely settlements with your insurance carriers

How We Add Value

BDO's Insurance Claim professionals have substantiated and prepared some of the largest and most complex property and business interruption insurance claims in the United States. Based on our collective experience, we field engagements with professionalism and sensitivity to your specific situations. BDO's insurance claim services fees are often included in your insurance coverage; however, companies may be unaware that professional claim preparation fees are specifically identified as a covered expense in their policies.
